

Raised Bill 6491 An Act Concerning Non-Lethal Electronics Defense Weapons

To the Honorable Members of the Judiciary Committee:

I would like to add my voice in support of Bill 6491. I'll be brief.

It defies logic that it is a class E Felony for someone to be in possession of a "Stun Gun" or other defensive electronic weapon outside the home.

State law requires a permit to carry this sort of weapon, however such a permit doesn't even exist on the state level, (only by town). In my view, this entire section of the law is in need of review. However, lacking that, common sense dictates that this current bill excluding defensive electronics weapons from the "dangerous weapons" category is a good start.

Please support Raised Bill 6491.
